

HEALTH

Information Sources
in the Barents Region

State Provincial Office of Lapland

Rovaniemi

2002

FOREWORDS

In your hands You hold the publication called Health Information Sources in the Barents Region. Same information you can find from the web-page:

<http://www.urova.fi/home/arktinen/terveys.htm>

The main goal to produce this kind of publication is to improve co-operation between the health professionals and other persons, who are interested in the health services and research in the Barents Region. The Health Information Sources in the Barents Region is the second version of the publication; the first one has been updated and modernised by the State Provincial Office of Lapland, Department of Health and Social Services. Now You can find the e-mail addresses and web-pages with the recent contact information inside one covers.

Nature and northern inhabitants are dependent on each other, so it was clear decision to utilise nature photos during the implementation of the web-pages. All the photos has been taken by the nature photographer, Aarno Torvinen from Lapland.

Honestly we hope that this publication will facilitate contacts over the border districts and throughout it will improve the living conditions of the northern people.

Leena Soininen
Provincial Medical Officer
State Provincial Office of Lapland

Leila Mansikka
